Dear Abby:

I am a 36-year-old college dropout whose life long ambition was to be a physician. I have a good job selling pharmaceutical supplies but my heart is in the practice of medicine. I do volunteer work at the local hospital on my time off and people tell me I would have made a wonderful doctor.

If I go back to college and get my degree, then go to medical school, do my internship and finally get into the actual practice of medicine, it will take me seven years! But, Abby, in seven years I will be 43 years old. What do you think?

-UNFULFILLED

Dear Unfulfilled:

And how old will you be in seven years if you don't go to medical school?

Make it a wonderful and happy week!!!!

The happy friends in your life,
