## MoNdAy FuNnIeS

One day the Lord decided to send down an angel to see how many people there were on the earth that were living all the commandments. After a few months the angel came back to report that there were only just a very, very few.

The Lord was so upset to hear that, He decided to send a second angel to do the same just to be sure.

After several months the second angel came back and reported that there were very, very few people on the whole earth that were living all the commandments.

Perplexed the Lord said well maybe we should at least send an email to each of those people who are living all the commandments to encourage them. So that is what He did.

Do you know what the Lord said in the email?

(You will have to look down below under the CONSUMER TIPS section where it says **ANSWER:** to find out what the email said.....)

# Consumer Tips

## HOAX VIRUS SCARES:

Seen this Teddy Bear Icon on your computer lately?

If someone sent you an email asking you to follow these instructions:

1. Go to Start, then click your 'Find' or 'Search' option
2. In the folder option, type the name... jdbgmgr.exe (The icon is a teddy Bear)
3. Be sure to search your C Drive and all the sub folders and any other drives you may have
4. Click 'Find Now'
5. The virus has a teddy bear icon with the name jdbgmgr.exe  
Do not open it!
6. Go to Edit (on the menu bar) and choose "Select All" to highlight the file without opening it.
7. Now go to File (on the menu bar) and select delete.

And then if they ask you to send the email with those instructions to every one in your address list to help them CLEAN THIS VIRUS OFF THEIR COMPUTER.... and you did it!!!!!!!

## YOU ARE NOW A VIRUS...

You helped everyone you know on your mailing list disable JAVA on their computer just like you did to your own computer.

(Do you think maybe it is possible a disgruntled JAVA employee may have started this HOAX VIRUS CHAIN LETTER SCARE?????)

If you did follow those instructions above and deleted that file (so now your JAVA wont work) it doesn't matter unless you do programming in the JAVA language. If you do and need to

restore it, you can go to this HOAX VIRUSES WEB PAGE

<http://www.symantec.com/avcenter/venc/data/jdbgmgr.exe.file.hoax.html>

And it will tell you how to get JAVA working on your computer again.

Could I just offer one word of consumer advice? If someone sends you something about any virus and asks you to mail it to EVERY ONE YOU KNOW, PLEASE hit delete.

There are no virus alerts sent out by email from person to person EVER!!! If there is a virus it will be announced in the news. You will hear it FIRST from Microsoft, McAfee and Norton, not your email neighbor. There are no viruses they don't know about. How would your email friends have found out about a virus that the big companies who do it for a living not know about? Think about that.

Just a consumer tip to think about.

~~~~~

**ANSWER: You don't know what the email from the Lord said? Well I can't tell you because I didn't get one either.**

~~~~~

**Make it a wonderful and happy week!!!!  
The happy friends in your life,
