## Wisdom For The Week :

A hard lesson for all parents to learn is that  
IT DOES NOT MAKE ANY DIFFERENCE WHAT WE  
ACTUALLY SAID,  
It only matters what our children HEARD US SAY.

Cordell Vail

MoNdAy FuNnIeS

When your wife says, "Well, what do you think?" she is not asking
for YOUR opinion. She is asking for HER opinion, from your
mouth.

When your wife asks, "Do I look fat?" the translation is: "Do I
look fatter than the neighbor/sister/friend?" (The appropriate
response is, "No".)

When she says, "How did you like dinner?" your answer should run
along the line of, "Good". DO NOT say anything such as,
"Interesting," or "What was it?"

When she says, "What do you want for supper?" the best answer
is, "Let's go out to eat."

# ConsumerTipS

(contributed by Arnie DeWalt... .Thanks Arnie)

Here is some more wisdom about preparedness

Another tip you can pass on to people. In the event of an emergency, it is often easier and quicker to have an OUT OF STATE focal for everyone to check in with (calling out of state is usually easier than calling a mile or two across town when everyone is trying to call everyone else) to make sure everyone is okay. Also emphasize that if we have a major natural disaster (earthquake) you might NOT be able to get "home". Bridges might not be passable (are you listening Cordell???) and you might have to make do with what you have in your car. (Warm blanket, good walking shoes .... and so on).

Arnie

(If you did not know Janice and I live across the Tacoma Narrows bridge... that is why he is asking if we are listening)

Subject: Hydrogen

Cordell,

Your search for a hydrogen powered car really had intrigued me. The curiosity got the better of me, so I started doing a little research behind this. After a lot of study, I am currently in the process of converting my 1978 Chevy Full Size Blazer and 1968 Ford F250 pickup. Thank you again for showing me your website.

Thank you for sharing,

Steve Hasenöhrl

This guy is a little harsh but has a great explanation and a wonderful set of plans.

<http://www.hasslberger.com/tecno/hydrogen.html>

This website I found by looking up <http://people.howstuffworks.com> and did a search on hydrogen economy.

It has a link on this page to the following website which I think you would find very interesting.

<http://www.futurehorizons.net/hyd2a.htm>
