## MoNdAy FuNnIeS

(Contributed by Jeanne Laudenberg.... thanks Jeanne)

Only blondes can tell blonde jokes

A certain person of unknown gender or hair color was visiting her of unknown gender or hair color friend who had acquired two new dogs, and asked the unknown gender friend what the dog's names were.

The certain person of unknown gender or hair color responded that one was named Rolex and one was named Timex.

The friend of unknown gender or hair color said, "Whoever heard of someone naming dogs like that?"

"HeLOOOooo," answered the friend of unknown gender or hair color . "They're watch dogs!"

# Consumer Tips

(Contributed by Linda Moore... Thanks Linda)

Ever try make a little sign on a small piece of paper. So you write the note on the little paper. Put the paper down on your desk top and then try to put a little piece of scotch tape over it so you can stick it up? The static in the tape will make the paper jump up off the desk to the tape, making it almost impossible to get it under the tape without being crooked. Well here is your solution. Just lick the paper a little before putting it on the surface of the desk where you are going to put on the tape. It will stay right in place waiting for the tape to kiss it.

**Customer comments:** MD Jones wrote to remind me about putting Elmer's glue on a sliver and letting it dry then pulling the dry glue and sliver off. We talked about that one before. That works really good. And Bev DeWalt suggested that Duct Tape will work too. She says if it is really stubborn, leave the tape on over night then it almost always works. Both those work good if the sliver still is sticking out. If it is under the skin imbedded, go for the magnifying eye piece and needle... (Thanks MD and Bev)
