### BULLS

Farmer Fred had a problem arise when, upon preparing his prize bull for market, the barn door slammed shut cutting the tail off the bull. His prize bull was to be sold that very day, yet now Farmer Fred couldn't ... whole sale him or retail him.

### COWS

Isn't it amazing that our government can track a cow born in Canada almost three years ago, right to the stall where she sleeps in the state of Washington (and they tracked her calves to their stalls). But they are unable to locate 11 million illegal aliens wandering around our country. Maybe we should give them all a cow.

I was going to write when you did the earthquake stuff and tell you...when i moved to LA back right after joining the LDS church and the LA 1971 quake the stake president had me interview over 20 families that had lost a lot during the quake....most of it could have been avoided if they had placed large lips (or most would call it molding) on the ends of their food storage shelves to keep things from falling off....the # 1 injury was cut feet from glass and people walking barefooted across the room or ????? to check on the family before getting them self together.....I was personally there in the 1994 quake in LA and the 2 biggest problems were nothing to drink and the hot water tanks falling over and the flex pipe breaking off....where I was staying in Burbank we had to drive to Covina to get the parts to fix the tank pipes.....all which could have been avoided with \$5 worth of metal strapping tape....feel free to share this if you would like too!
