## Wisdom For The Week :

We all make our own success... or unmake it.

Boudreaux's first military assignment was to a military induction center, and because he was a good talker they assigned him the duty of advising new recruits about the government benefits, especially the GI insurance to which they were entitled.

Before long the Captain in charge of the induction center began noticing that Boudreaux was getting a 99% sign up for the top GI insurance.

This was odd, because it would cost these poor inductees nearly \$30.00 per month more for their higher coverage than what the government was already granting.

The Captain decided that he would not ask Boudreaux about his selling techniques but that he would sit in the back of the room and observe Boudreaux's sales pitch.

Boudreaux stood up before his latest group of inductees and stated, "If you have da normal GI insurance and go to Iraq and get killed, the government pays your beneficiary \$6,000. If you

take out da supplemental GI insurance, which cost you only \$30.00 a month, the government has to pay your beneficiary \$200,000. "NOW," Boudreaux concluded, "which bunch do you think dey gonna send to Iraq first?"

Consumer Tips

Has anyone ever heard that hot water will freeze faster than cold?

Also have you ever seen super cooled water. If you put a plastic pop bottle filled with water in the freezer and then just before it turns to ice if you take it out very carefully and don't bump it, it is still water. Then if you tap the bottle with a knife handle it turns to ice slush right before your eyes. Makes a great party trick and makes for a great cold drink too. The trick is to know just how long in your freezer before it actually turns to ice. You may have to try it a few times and time it.
