## Wisdom For The Week :

I wonder how many of us are  
spending money we don't have  
to buy things we don't need  
to impress people we don't like?  
Will Smith (comedian)

(this is not a story about Chris just a 1st person narrative by the person who it happened to)

### PREGNANT TURKEY STORY

One year at Christmas my mom went to my sister's house for the traditional feast.

Knowing how gullible my sister is, my mom decided to play a trick. She

told my sister that she needed something from the store.

When my sister left, my mom took the turkey out of the oven, removed the stuffing, stuffed a Cornish hen, and inserted it into the turkey, and re-stuffed the turkey. She then placed the bird(s) back in the oven.

When it was time for dinner, my sister pulled the turkey out of the oven and proceeded to remove the stuffing. When her serving spoon hit something, she reached in and pulled out the little bird.

With a look of total shock on her face, my mother exclaimed,

"Patricia, you've cooked a pregnant bird!" At the reality of this horrifying

news, my sister started to cry.

It took the family two hours to convince her that turkeys lay eggs!

## Consumer Tips

I love to cook breakfast. We even cook breakfast for supper all the time. One of the things that happens to me all the time when I am cooking my "DOUBLE BARRELED BREAKFAST" (as my kids call it) for the whole family is that I crack 10 or 12 eggs into a bowl to scramble and then discover there is a piece of shell in the raw eggs. Every tried to chase down an egg shell in a bowl of eggs? It is like the opposite ends of a magnet no matter what you use. It is no better in the fry pan even with just 2 eggs. That shell thinks it is some game of hide an seek when you try to pluck it out.

An old chief friend of mine solved that problem for me a few years ago. He told me that when there is a shell fragment in the raw egg instead of trying to use a spoon, fork or any other foreign object including your finger, just use a piece of the egg shell for one of the cracked eggs. For some reason the shell in the raw egg will repulsed any foreign objects trying to touch it. However a piece of the egg shell itself will go right though the raw egg to the shell fragment, pick it up and bring it out in one easy step. I guess egg fragments know their own kind when they meet. So it actually sticks to it rather than slither away. Know you know my old Chief's secret shell extraction method.
