Wisdom For  The Week :

Some times really intelligent people
are not very smart in the right things.

Some pretty funny labels appear on products some times. Here
are a couple:

A heat gun used to remove paint will reach temperatures of up to 1,000
degrees. One manufacturer put the following label on their heat gun:

"Do not attempt to use this tool as a hair dryer"

Have you seen a label on the package of kitchen knives that reads:

"Do not try to catch a falling knife"

Another company that makes metal baking pans put this label on their
pans:

"Warning: the pan will get very hot when used in the oven"

And of course we have all see the ones on foreign made products like this one:

"Do not bake with children in the oven"

To get something out of a heat register or under the fridge, add an empty paper towel roll or empty gift wrap roll to your vacuum. It can be bent or flattened to get in narrow openings.

Make it a wonderful and happy week!!!!
