

# MoNdAy FuNnIeS

17 March 2008

From Cordell & Janice Vail

---

The MoNdAy FuNnIeS were started on the 22nd of Sept 1997.  
This is our 11th year of trying to help you smile every Monday Morning.

Now that is a lot of smiles!

MoNdAy ☺ FuNnIeS

Now we all know how to tell when it is leap year day. OK!!! Now for the really tough one. Do you know how they decide what day Easter will be on each year? That is not quite so easy. If you have always wondered, here is your chance to find out.

There are a couple methods to figure it out.

1. Just look on the calendar. (well now you knew I was going to throw that one in didn't you.....)
2. Short Answer: Easter Sunday is the first Sunday after the first full moon after Vernal Equinox.
3. Long Answer: If you are with me and really don't know what an "equinox" is, let alone Vernal's version of it, and don't want to admit it to your friends, then here is a web page that will give you the real scoop (several pages long) on all three ways to figure out when Easter will be using golden numbers, the Gregorian Calendar and using the Julian calendar.

<http://webexhibits.org/calendars/calendar-christian-easter.html#Anchor-42056>

Whew..... when I read that web page, I could not help but think someone must have just been really bored and needed something really complicated to do for a weekend. YIKES.... I will stick with method #1 for now ....

But any way..Happy Easter! (My most favorite holiday of all the year) - Cordell

Consumer

TipS

DUST CAN BUST YOUR COMPUTER

In addition to doing those other things you ought to take care of

twice a year (like changing your toothbrush and replacing your furnace air filter), spring is a good time to clean your gadgets and computers to ensure they keep running well and looking good. To do this you can go to some place like Office Depot and buy a can of compressed air. (that is what those are specifically for). Or if you don't want to buy a can of compressed air, just put the hose on your vacuum so it blows instead of sucks. If you don't have one of those long narrow car seat or furniture cleaning ends for your vacuum you can easy make one to channel the air to a very small stream to blow the dust out of your compute. Just take an empty paper towel roll or empty toilet paper roll and put it on the end of the vacuum and then pinch the end off so you have a narrow opening. Now just blow out your key board and the air fans on your computer so you have a clean flow to help keep your computer cool.

---

Make it a wonderful and happy week!!!!  
The happy friends in your life,
